MCI return to award winning Salvus House

Three years after completing the fit-out of Salvus House, the prestigious new international headquarters of Sunderland Marine Mutual Insurance, MCI have made a return visit to install extra workstations. As the company expands its workforce, it has been a pleasure to supply their needs and to see how the interior and furniture are withstanding the ravages of time!

The building and its interior is still as pristine in its visual impact as the day it opened in August 2005. As one of MCI's main objectives is to achieve workplace solutions of space and resources for clients and to understand

the challenges to their organisation, we were delighted to find that Sunderland Marine staff members continue to enjoy an exceptional working environment.

This superb workplace bears out the energy and vision both of the Sunderland Marine directors and the commitment and dedication of their staff and is one which we are happy to regard as a resounding success for all parties.

WINNER: THE LANDMARK OFFICE BUILDING OF THE YEAR 2005

MCI

take

Victrex plc

into the

21st

century

When Victrex plc decided to redesign and refurbish their UK headquarters on their manufacturing site near Blackpool, they commissioned MCI to undertake the project.

Victrex plc is the leading global manufacturer of high performance polymers for the aerospace, automotive, electronics and medical sectors. With production facilities in the UK, backed by sales and distribution centres serving more than 30 countries worldwide, an update of their facilities was

essential to provide this innovative world leader with a 21st century cutting edge environment.

The high risk location on a chemical engineering site presented some distinct challenges. Detailed risk assessments and permits for sub-contractors were produced, together with a closely planned and monitored time schedule in order to comply with health and safety regulations and to facilitate the continuing work of the company staff.

MCI Design Director Duncan Horner worked closely with Victrex project manager Amanda Wright to interpret and implement the client's design concepts; their meticulous attention to detail on an almost daily basis conspired to ensure that their headquarters was given a complete makeover, providing the most up to date reception, boardroom and meeting rooms and an outstanding workplace in which to further the company's success.

MCI have moved to larger premises

MCI are delighted to have moved to our new home on the business park at Melmerby, north of Ripon. Purpose built to our specifications, the new offices and showroom enable us to showcase the latest design and technology of the most up to date products. Desking, seating (operator chairs, executive seating, and soft seating), tables, storage units and partitioning are all displayed to maximum effect in our comfortable and air conditioned premises.

We are open from 9-5 Monday to Friday and on Saturdays by appointment and welcome visits from prospective clients.

If you are relocating or refurbishing, it is often very useful to see several products...
... you may find just what you are looking for or change your mind completely!

NEW PRODUCT!

MCI are pleased to be partnered with Håg, the prestigious Norwegian seating manufacturer renowned for their eco-friendly approach to manufacturing ergonomically designed chairs which contribute to maximum comfort and protection for the user.

Håg operates according to the principle of preserving our common environment. In 1995, Håg started to use recycled car bumpers and plastic waste for the plastic components of their chairs and were the first office chair manufacturer to become ISO 14001 certified, EMAS registered and ISO 14025 certified. As the user of a Håg chair, you will not be exposed to substances that pose a health risk or pollute the indoor environment.

Håg also contributes towards reducing greenhouse gas emissions by

guaranteeing that 100% of the factory's electricity consumption comes from renewable energy sources. Finally, quality is never compromised when it comes to choice of materials, product development or technological processes and a 10 year guarantee is provided on manufacturing faults.

Why pay for everything upfront

When you can

finance your whole

project?

MCI's independent Finance partner, Bluestone Leasing can work with you to provide finance options to purchase furniture through to a complete interior fit out.

Bluestone specialise in providing finance to our industry and are highly experienced in ensuring that entire project costs can be financed. Paying for depreciating assets over their useful life especially when tax benefits are taken into account is hugely attractive for most businesses.

Why Lease? – The Benefits Of Leasing

- ✓ Significant business tax benefits
- ✓ Payments are spread evenly over the useful life of the assets
- ✓ VAT paid on each payment rather than lump sum upfront
- ✓ Ability to upgrade equipment during lease with refresh option
- ✓ Cash retained in your business & existing credit lines unaffected
- ✓ Option to retain or upgrade equipment throughout the lease

MCI will be happy to provide a bespoke illustration comparing the true costs of paying cash versus leasing specific to your organisation – just ask for further details.
