

MCI complete an interior design and fitout service within the prestigious Inspire building.

Inspire is the name of the intriguing pyramid shaped building on the Hornbeam Business Park in Harrogate. It has become something of a local landmark and provokes many comments and questions across the town, so it was exciting for MCI to lend their expertise to one of its new occupants.

Principal Hotels have taken the 1st and 2nd floors for their new headquarters. Formerly housed in a large Victorian property in the town, their new company home is indeed inspiring - of cutting edge design, light and airy and one which will provide the company with excellent working conditions. MCI have installed partitioning and carpeted the offices, and the finished result

lends a welcoming warmth to the office environment.

We wish Principal Hotels a prosperous future in their new home; we have been delighted to contribute to the appearance of this landmark design and congratulate all concerned on their courage in designing and occupying a building which is so different from its neighbours.

MCI design and install a fashionable breakout area for staff at Kingston Communications.

MCI have recently installed attractive new partitioning and breakout areas in one of Kingston Communications' buildings. The creation of a new meeting room was achieved by partitioning off a section of the existing offices.....

A relaxing breakout area with café style tables and high stools and a separate relaxation area provide welcome space for staff in which to take breaks and to meet informally. Flowing lines and varying furniture heights add to the modern and relaxing feel of this area whilst the red sofas and chairs are visually stimulating against the cooler blue floor.

MCI now include Dieffebi Primo System File in our extensive resource for quality business storage solutions.

The highly versatile, attractive and cost effective range was deigned by Takiro Yuta for the Italian manufacturer and has proved a success with end users and architects alike. Available in a variety of colours and finishes, this range also boasts the unique ability to stack, making it an invaluable and flexible core product in any business environment.
